### Cool Idea: Make an Erupting Volcano.

Making a volcano that erupts is something that kids love! Have lots of "PEAL Starch mixture" on hand, as kids want to participate and see the volcano erupt again and again! Ages 6 and up.

#### Things You'll Need

- 1 Cup of Peal Starch
- 1/4 Cup of Baking Soda
- 2 Drops of Dish Soap
- Red Food Coloring
- 1 Cup Vinegar
- Foil
- Empty gallon jug, plastic

#### Directions:

1. Beginning with a clean, empty gallon jug, begin building foil on the outside of the jug to resemble a mini-volcano.

2. A realistic looking volcano can be achieved using playdough and paint to decorate the foil.
3. Once you've built your volcano, mix PEAL Starch, water and salt to make the paste the consistency of thick gravy.
4. Mix the PEAL Starch mix with baking soda, and pour half way into the volcano/jug.
5. Mix food coloring with vinegar in a separate cup. Add 2 drops of soap (make sure you add soap, it slows the reaction).
6. When you are ready for the eruption, pour the vinegar mixture into the cup and watch the eruption!

\*\*\*Adult supervision required.

You may purchase PEAL starch at [www.PealStarch.com](http://www.PealStarch.com)
